Subject: Ohio EPA general permits

Andy,

Here is the link to Ohio's General Permits for oil and gas production operations. The two permits are essentially exactly the same.

<https://www.epa.ohio.gov/dapc/genpermit/oil-and-gas-well-site-production>

Here's also a link to Pennsylvania's General Permit for oil and gas operations, including storage vessels. I don't know offhand if Pennsylvania DEP and EPA interpret the provisions to constitute a "legally and practically enforceable limit" for purposes of determining potential for VOC emissions and OOOO and OOOOa applicability for storage vessels (I don't believe that the permit contains any actual numeric limit for VOC PTE), but the permit gives more examples of provisions that are functionally equivalent to OOOO and OOOOa requirements for controlling emissions from the storage vessels and associated closed vent systems.
